

WATERBRICK®

Containers:

Multiple Uses, Multiple Solutions

STACK

POUR

CARRY

“This thing is great.”

Review by Jeremy – 8/19/2011

“After much research for water storage for emergencies I concluded this (WaterBrick container) was the best option. You can stack them easily like legos so the total number is up to you. They are durable and with their size and carry handle, you can easily tote them around as needed unlike some other larger containers.”

**Weight of 3.5 Gallon
WaterBrick Filled With:**

Water	28 pounds
Long Rice	25 pounds

72 Hour Emergency Grab & Go

One of many uses....

WaterBrick containers can be easily accessed for portable and clean water during emergency situations as part of a 72 hour grab and go kit. They are ideal for Preppers, survivalists and even families who are preparing for upcoming natural disasters or power outages.

- Store emergency water discreetly inside homes instead of outside in unsafe temperatures
- Collectively cross stacks for bulk storage, easily configures for your limited space, individually easy for grab & go
- Freeze as an ice block for limiting food or medication spoilage

Features:

- FDA Approved & BPA Free: HDPE Plastic Food Grade Container
- Ultra Violet Protectant: Non-bio degradable material extending life up to 15 years or longer
- Comfortable Carrying Handle: offers easy comfort for long distances
