

WATERBRICK® Containers: Multiple Uses, Multiple Solutions

Boating or Rafting

One of many uses....

Use WaterBricks for your next boating trip and enjoy the durability of a water container that can survive your next adventure.

Features:

- Easy to Secure in Transit: Tie down easily with a bungee cord or other strap through the designed column holes in the container
- Average container wall thickness is approximately 1/8 of an inch (0.125)
- Notched Lid with Full Gasket: Allows a person to easily open the lid while the heavy duty full gasket provides an air tight seal
- Wide Lid Opening: An average adult can easily reach in for stored contents
- HDPE Plastic Resin: FDA approved and BPA free food grade containers
- Ultra Violet Protectant: Added to lengthen the life of the container and protect from the sun

Review from Debi in Colorado

11/26/12

"I bought two WaterBricks to hold water for a rafting trip down the Grand Canyon. These WaterBrick containers worked out extremely well for me and my fellow rafters. We especially liked that WaterBricks can lay on their side while loaded down on the raft and they did not leak unlike other containers. They are easy to strap down through the two holes so they were very secure during the entire trip."
